

# Setting up a Custom Table

**Q:** How do I set up a table to play with 4 specific people?

To set up a table with four people, go to the **Casual** section. Instead of the top options, go down to the **Start a table** option.

From the next screen, you can set up the table anyway you like. In particular, to set up the players in a specific way, click on the direction and type in their User name. For example, if you wanted Linda Starr to sit West, you would click on West and type in **EllieMae48**, her id. Then, she'll be the only one who can sit West. If you do this, you'll generally want to switch the **Permission required to play** option on. Otherwise, if one of your players accidentally drops off, the spot might be filled by anyone.
