

Parking

Each of the tenants of our industrial park is assigned the parking spaces against the building immediately in front of and in back of their location. When the other tenants are open for business, do not park in their assigned spaces. We have exactly 5 spaces in the front and 5 in the back of our location.

All marked spaces in the two lots are available for us. There are semi-tractor trailer trucks making deliveries to our neighbors. Please park ONLY in marked spaces, so the big trucks have room to maneuver without damaging your car.

The area around the dumpsters at the rear of the parking lot is NOT marked for parking. The trucks that come to empty the dumpsters need room to maneuver and your car is in jeopardy if you park too close to the dumpsters. Be sure to park in MARKED parking spaces ONLY.

Be sure to lock your car and remove all valuables from sight. Although we have a security guard at night, break-ins have been reported during the daytime games. Don't let the fence around the property lull you into a false sense of security!

We have designated 8 spaces as "courtesy" handicapped spaces, but we have many more than 8 members who have mobility issues. If you are able-bodied, please be kind to those less mobile, and park farther from the doors, so those who need to be close can use the nearer spaces.
